

## MOISTURE ADJUSTMENT CHART FOR INGREDION CANADA CORPORATION

*Subject to Revision without Notification*

*For moisture acceptance thresholds, refer to the "Corn Discount Schedule for Ingredion Canada Corporation"*

*For deliveries with moisture from 15.6% to 16.4%, a shrink factor (kg divisor) converts wet kilograms to dry metric tons.*

*For deliveries with moisture at or above 16.5%, CCFM is treated as dockage to be deducted from the gross weight to arrive at the net wet quantity. A shrink factor (kg divisor) converts net wet kilograms to dry metric tonnes and is applied to the net wet quantity to arrive at the net dry quantity. Moisture adjustment discounts also apply.*

*Shrink factors and moisture adjustment discounts will be applied as per the following chart:*

### Moisture Adjustments CAD \$
